

Innovative solutions in Engineering, Services  
and Products for nuclear and highly regulated environments

**NUVIA**

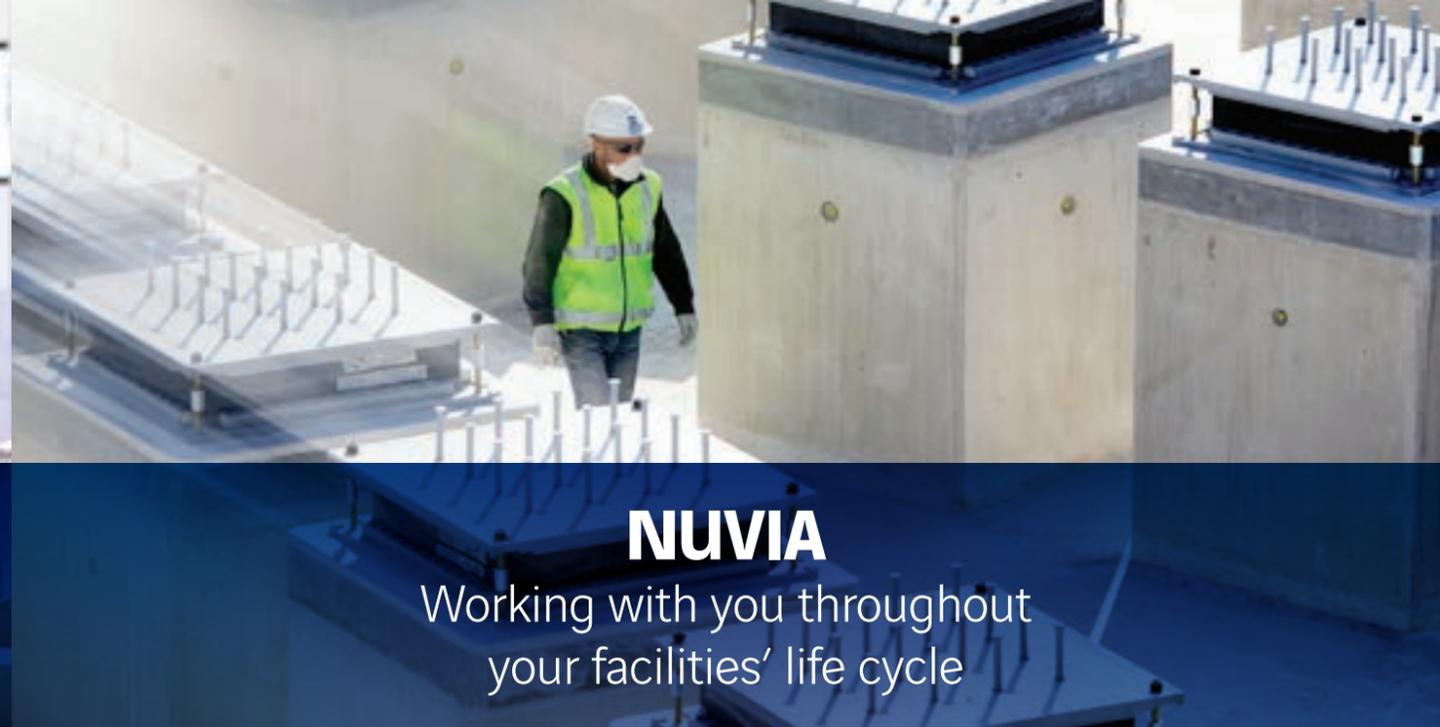

Nuclear Technology **and Innovation**

## NUVIA

The benefits of global expertise tailor-made to fit your requirement

## NUVIA

Working with you throughout your facilities' life cycle

### NUVIA is YOUR NUCLEAR PARTNER.

The NUVIA Group prides itself in working collaboratively with its customers at all stages of a nuclear facility's life cycle: design, construction, operations, maintenance, decommissioning... We deliver our expertise through 3 complementary activities:

### Engineering • Services & Works • Products

Discover our knowledge throughout the nuclear field, in speciality activities (civil engineering, waste management, nuclear measurement, fire protection...) as well as in the design and construction of essential support facilities such as waste treatment plants, and so on.

## CONSTRUCTION

NUVIA operates at all stages, from the design to the construction of nuclear facilities: in engineering, as a specialised partner, with a wide range of specific products (facility protection against fire, earthquake, flood, dissemination and radiological risks) or as a global integrated contractor, delivering turnkey projects.

## OPERATIONS

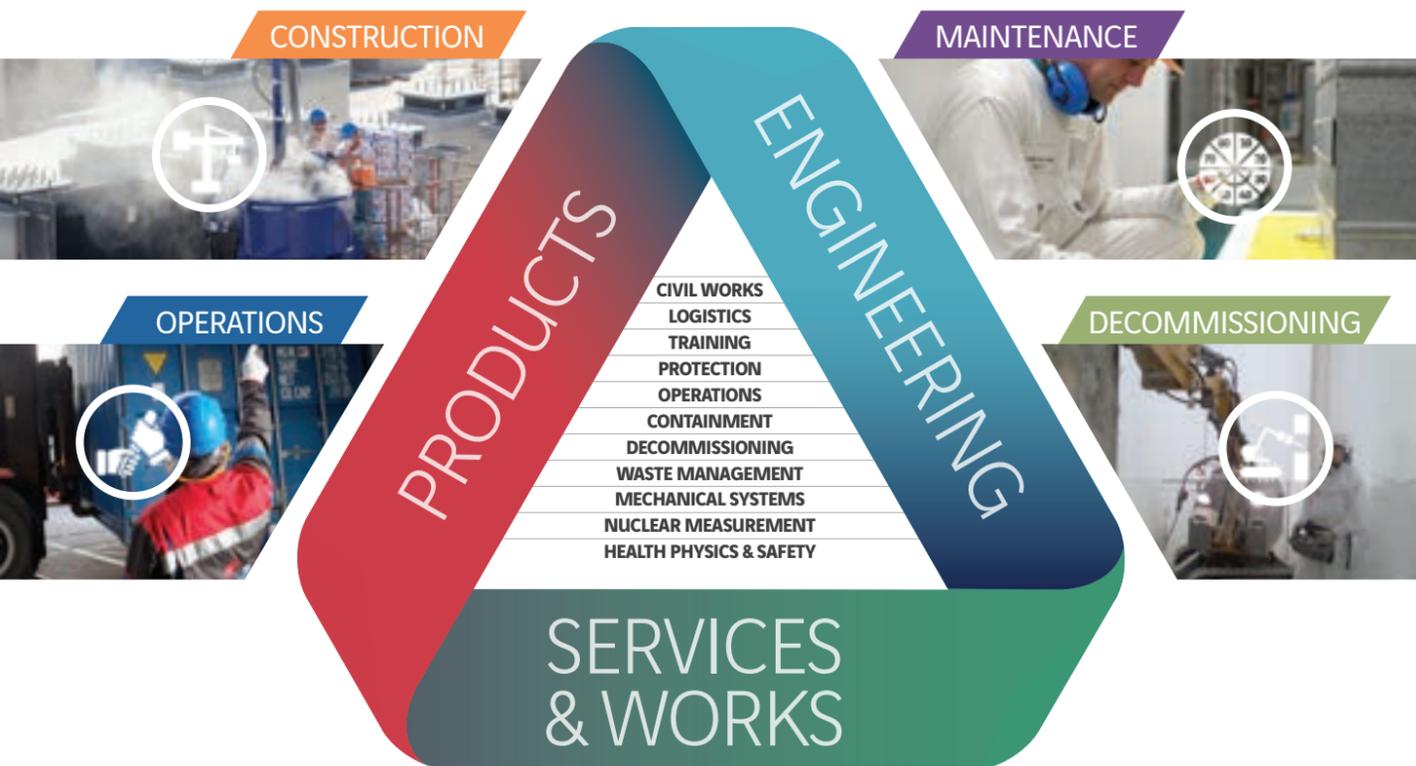

NUVIA provides operations and industrial contractor services on all categories of nuclear facilities. We also supply our clients with an array of support services, among which are radioprotection, security and safety, handling, logistics and waste management.

## MAINTENANCE

NUVIA offers an extensive range of products and technical expertise to help you optimise maintenance operations as far as costs, deadlines and safety are concerned.

## DECOMMISSIONING

NUVIA has developed unique and unparalleled know-how and technologies in the field of process and facility decommissioning. Such considerable expertise is the result of decades of experience operating in the heart of nuclear works and facilities of all kinds.

## ENGINEERING

We support you and your projects from concept to implementation

## SERVICES & WORKS

Skills and people dedicated to the success of your most complex projects

*From risk management to facility design and construction: our offer fits your requirement.*

### SPECIALISED ENGINEERING

NUVIA is a valued partner when it comes to protecting your facilities and machinery, managing risks or protecting the environment and people.

### GENERAL ENGINEERING

NUVIA stands out as a major partner for the design and construction (EPC) of nuclear support facilities around the world.

WASTE TREATMENT

WASTE STORAGE

SUPPORT FACILITIES

*As global or specialised partners: we put in place a precisely optimised organisation to meet your project needs.*

NUVIA has developed a broad range of technical skills at the service of nuclear contractors. Our specialities range from operational logistics to mechanical works, civil engineering, or special works.

Such expertise, added to an extensive experience of operations on nuclear sites, enables us to develop innovative techniques and solutions that directly benefit our clients.

DECOMMISSIONING

MECHANICAL SYSTEMS

CIVIL WORKS

LOGISTICS

**PRODUCTS**  
 Continuous innovation to develop  
 ever-improving solutions

**PRODUCTS**  
 A global offer that encompasses  
 expert skills to meet your needs

*Our R&D teams are devoted to finding the best solutions to your issues by developing innovative technologies. Two ranges of products have been created for use during conception, qualification, production or implementation on site.*

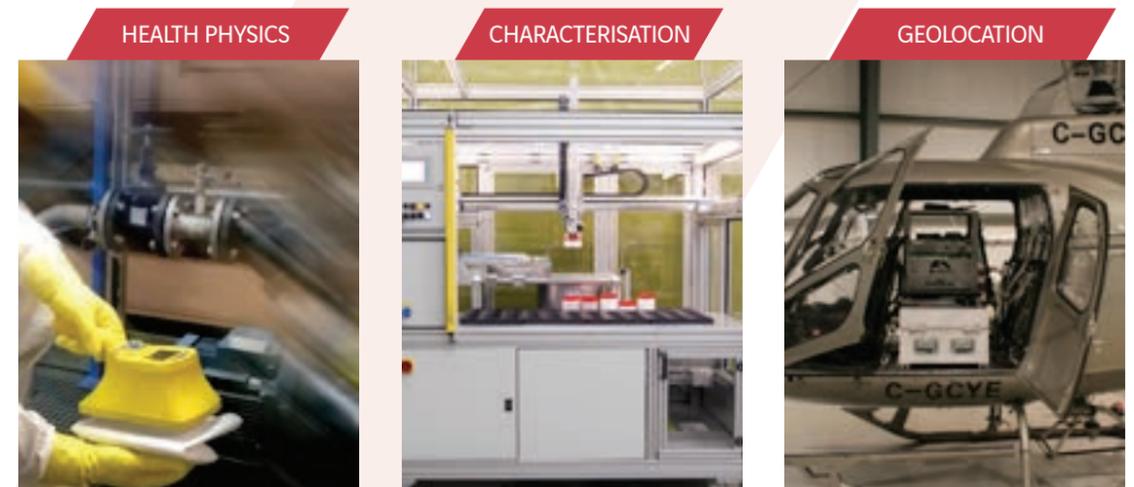

**NUVIATECH Protection**

Managing facility risks is the core of NUVIA's approach and therefore of our services. We pride ourselves in offering a consistent range of specific products and services, whatever the risk: fire, floods, dissemination, earthquakes or radiological risks.

**NUVIATECH Instruments**

NUVIA offers a complete catalogue of components (analysers, detectors, software), as well as equipment systems specifically designed for waste management, homeland security, environmental monitoring, continuous process monitoring, health physics and laboratories.

# Our Assets

The expertise of specialists

Transparency and feedback

Customer satisfaction and fulfilment of commitments

Project Management

Constant innovation & cutting-edge technologies

Safety and Security mastery

**NUVIA** is an international Group present in more than 11 countries, with recognised nuclear expertise and a workforce of 3000 employees: experts in all specialities, engineers, technicians and operators.
